

Evolving Scalable Soft Robots

Senior Thesis Presentation

Ben Berger

Advisor: John Rieffel

Soft robot examples

TELEVANDALIST

How do we make soft
robots **move**?

(Hint: It's really hard!)

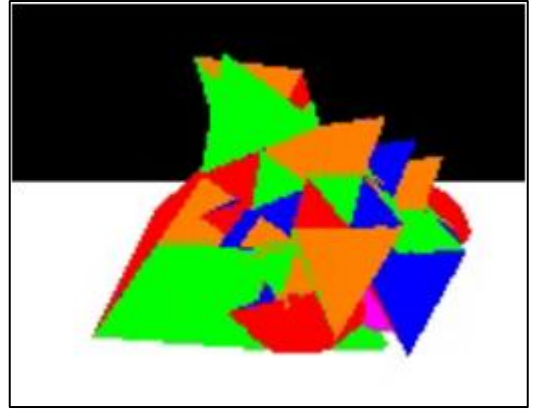

We can outsource cognition to the body,
analogous to how a fly's wings beat 4x
faster than its nerve impulses

Generative Encoding

Generate Population of Encodings

For each encoding:

Grow Robot

Evaluate in Simulation

Select Best Designs

Breed New Population

SEGMENTATION FAULTS

Too many graphics windows

Command line arguments

Global variables

Memory leaks...

Best Fitness Value per Generation

How do we create
scalable soft robots?

Fitness Over Course of Development

Pareto Dominance

Generate Population of Encodings

For each encoding:

Grow Robot

Evaluate in Simulation

Select Best Designs

Breed New Population

Generate Population of Encodings

For each encoding:

For each expansion:

Grow Robot

Evaluate in Simulation

Remove Dominated Individuals

Breed New Population

Future Work

Pareto front code will be done next week.

Jupiter, I'm coming for you!
